

# HOW TO USE XELFEX WITH BARE HANDS

**WARNING:** Xelfex is not a condom. Do not use it to have sex.

Tear open the Xelfex package to find the masturbator and a lube sachet inside. Retain the package for disposal of both items after use.

Adjust the unrolled length of the masturbator before wearing it, such that the napkin at its open end will be unrolled at the base of the penis when you wear it. That will leave some empty length at the tip, to comfortably stroke the penis.

Be sure the rolled up ring is on the outside. Open the lube sachet and pour lube inside the masturbator.

Squeeze the unrolled part gently to remove trapped air inside, and place it on the head of the penis. Then unroll it all the way to the base of the penis.

Spread the lube all over the penis by raising the tip up and then gently stroking it, pushing the lube from the tip of the masturbator to other areas.

Enjoy stroking as desired. Ejaculate inside the masturbator.

After ejaculation, pull it off gently while rubbing the napkin over the penis to clean it before it gets completely flaccid.

Place the used masturbator back in the Xelfex package and zip lock it, to dispose off as per your convenience.
